

Each tooth consists of a **CROWN**, the part you see sticking out from the gum; and a **ROOT**, the part embedded in the jawbone and gum.

**Enamel**-the hardest substance in the body.(Harder than bone)

**Dentin**-the bone-like substance under the enamel, sensitive to temperature and sweets.

**CROWN**

**ROOT**

**Gum**

**Pulp**- the center of the tooth containing the nerves.

**Root**

**Jawbone**
